

# ASSESSMENT & ARCHITECTURE

## From architecture to delivered solutions

**Beyond advisory and design, iThink delivers complete, end-to-end solutions through active specialist partners.**

Through active specialist partners, iThink turns business needs into working infrastructure. We assess the current estate, define the target architecture and manage delivery of the approved modernization roadmap through configuration, integration, deployment, training and handover, with ongoing support as agreed.

### CONNECTED CAPABILITIES

01

#### Infrastructure inventory

Establish assets and dependencies so the solution fits the current estate and can be implemented in controlled phases.

02

#### Health and capacity

Review health and capacity, then implement agreed improvements around business requirements and service needs.

03

#### Risk and maturity

Identify infrastructure gaps and deliver prioritized remediation within the approved modernization scope.

04

#### Architecture and standards

Design the target architecture and configure the solution to agreed security, capacity and resilience standards.

05

#### Investment priorities

Translate approved investment priorities into a sequenced delivery plan with clear dependencies and acceptance criteria.

06

#### Modernization delivery

Implement the approved roadmap through integration, deployment, validation, training and operational handover.

### BUILT AROUND YOUR OPERATIONS

**For organizations seeking one partner to assess, design and deliver infrastructure modernization, with clear scope and operational ownership.**

# From architecture to implementation

Assessment and architecture shape the solution. Through active specialist partners, iThink carries the agreed roadmap through implementation, validation and handover.

## A TYPICAL ENGAGEMENT JOURNEY

### 01

#### ASSESS

Establish assets, risks and business needs.

### 02

#### DESIGN

Agree architecture and delivery phases.

### 03

#### DELIVER

Configure, integrate and deploy the solution.

### 04

#### HAND OVER

Validate, train teams and start agreed support.

Illustrative engagement. Final sequence follows the agreed scope.

## BUSINESS BENEFITS

### Working solutions

Turn approved architecture into implemented infrastructure that supports operations.

### Controlled investment

Connect each delivery phase to business priorities, dependencies and acceptance criteria.

### Operational readiness

Give teams validated configurations, documentation and training for handover.

## Integration and deployment

Through active specialist partners, iThink configures, integrates and deploys the approved modernization phases across the existing estate, following the agreed architecture and dependencies.

Through active specialist partners, iThink validates outcomes, documents the environment and trains teams. Operational handover and continuing support follow agreed responsibilities.

### Scope to confirm

Assessment coverage, architecture detail, implementation phases, validation, training, handover and ongoing support are defined in the agreed scope.

## The iThink approach

### ASSESS AND DESIGN

Ground the solution in business needs and evidence from the current estate.

### PLAN DELIVERY

Confirm phases, dependencies, responsibilities and acceptance criteria.

### IMPLEMENT AND VALIDATE

Configure, integrate and deploy; check the delivered solution against agreed outcomes.

### TRAIN AND SUPPORT

Prepare teams, hand over documentation and provide support as agreed.

## Discuss your modernization solution

Let us take your infrastructure priorities through architecture, implementation and handover.
