

CLOUD & PLATFORMS

Platforms delivered for your business

Beyond advisory and design, iThink delivers complete, end-to-end solutions through active specialist partners.

iThink designs cloud, private cloud, on-premise and hybrid solutions, with configuration and deployment through active specialist partners. We deliver platform enablement, integration and migration across servers, virtualization, storage and backup, with validation, training, handover and ongoing support as agreed.

CONNECTED CAPABILITIES / WHAT CLOUD & PLATFORMS COVERS

01

Deployment model

Select and implement cloud, private cloud, on-premise or hybrid architecture around business needs, risk and total cost.

02

Servers and virtualization

Configure and deploy server and virtualization environments to the agreed architecture, capacity and resilience needs.

03

Storage and backup

Implement storage and backup configurations, then validate agreed capacity, dependencies and recovery arrangements.

04

Microsoft 365 enablement

Configure and enable Microsoft 365 capabilities and integrations within agreed licensing, access and operating requirements.

05

Azure and AWS enablement

Configure and deploy agreed Azure or AWS environments, connecting selected services with the wider technology estate.

06

Migration and optimization

Execute scoped migrations, validate workloads and optimize the selected environment against agreed operating requirements.

BUILT AROUND YOUR OPERATIONS

For organizations modernizing servers or moving workloads that need one partner for platform design, implementation, migration and handover.

Delivering your platform environment

Through active specialist partners, iThink delivers the selected platform through configuration, integration and migration, then validates readiness and prepares teams to operate it.

A TYPICAL ENGAGEMENT JOURNEY

01

ASSESS

Review workloads, platforms and business needs.

02

DESIGN

Agree deployment model and target architecture.

03

DELIVER

Configure, integrate and migrate workloads.

04

HAND OVER

Validate, train teams and start agreed support.

Illustrative engagement. Final sequence follows the agreed scope.

BUSINESS BENEFITS

A working platform

Deploy an environment matched to business needs, architecture and operating requirements.

Controlled migration

Move agreed workloads through sequenced changes and documented validation.

Prepared operations

Equip teams with configurations, documentation and training for ongoing management.

Integration and deployment

Through active specialist partners, iThink configures and integrates the chosen platform with workloads, identity, networks, storage and backup, then executes the agreed migration.

We deploy and validate workloads, document the environment and train administrators. Optimization and continuing support follow the agreed scope.

Scope to confirm

Platforms, licensing, hosting, configuration, migration, backup and support depend on scope. Microsoft 365, Azure and AWS are options assessed against business requirements.

The iThink approach

ASSESS REQUIREMENTS

Understand workloads, current platforms, risk and operating needs.

DESIGN THE PLATFORM

Align deployment, capacity, storage and resilience with the target outcome.

IMPLEMENT AND MIGRATE

Configure services, integrate dependencies and execute agreed workload migrations.

VALIDATE AND SUPPORT

Check readiness, train administrators and provide agreed optimization and support.

Discuss your platform solution

Let us deliver the platform and migration approach that fit your business and operating requirements.
