

CYBERSECURITY & DATA PROTECTION

Security solutions implemented across your estate

Beyond advisory and design, iThink delivers complete, end-to-end solutions through active specialist partners.

Through active specialist partners, iThink delivers cybersecurity and data protection solutions across identity, endpoints, networks and data. We assess risk, design and implement controls, integrate monitoring, validate configurations and prepare teams through training and handover, with ongoing support as agreed.

CONNECTED CAPABILITIES / WHAT CYBERSECURITY & DATA PROTECTION COVERS

01

Security assessment

Identify control gaps and prioritize risk, then deliver the approved remediation and security improvement scope.

02

Identity and access

Implement agreed identity and access controls and zero-trust measures around users, systems and business risk.

03

Endpoint and network

Configure and deploy layered endpoint and network protection, integrating controls with the existing environment.

04

Vulnerability management

Identify vulnerabilities, implement agreed remediation and hardening, then validate changes and review progress.

05

Monitoring and readiness

Integrate scoped security monitoring, configure alerts and prepare incident procedures with accountable teams.

06

Privacy and governance

Implement agreed privacy controls and ISO/IEC 27001-aligned governance practices with management oversight.

BUILT AROUND YOUR OPERATIONS

For organizations seeking an implementation partner to strengthen security controls, protect data and prepare teams for continuing operations.

Delivering security and protection

Through active specialist partners, iThink translates risk findings into implemented protection, validated configurations and practical operating procedures within the agreed scope.

A TYPICAL ENGAGEMENT JOURNEY

01

ASSESS

Review exposure, maturity and existing controls.

02

DESIGN

Agree target controls and remediation priorities.

03

IMPLEMENT

Deploy protection, harden and integrate controls.

04

VALIDATE

Check controls, train teams and hand over.

Illustrative engagement. Final sequence follows the agreed scope.

BUSINESS BENEFITS

Risk led delivery

Turn prioritized findings into implemented controls and remediation actions.

Integrated protection

Connect identity, endpoint, network and data controls in the delivered environment.

Operational readiness

Prepare teams with validated settings, documentation and response responsibilities.

Integration and deployment

Through active specialist partners, iThink configures and integrates controls across identity, endpoints, networks, platforms and data. Remediation and hardening follow approved risk priorities.

We validate controls, document configurations and train teams. Monitoring, incident readiness and continuing support follow the agreed operating scope.

Scope to confirm

Confirm assessment boundaries, monitoring coverage and incident ownership. ISO/IEC 27001 alignment does not establish certification or guarantee compliance or breach prevention.

The iThink approach

ASSESS AND DESIGN

Connect exposure and control gaps with a prioritized security solution.

IMPLEMENT PROTECTION

Configure, deploy and integrate controls; carry out agreed hardening.

VALIDATE AND TRAIN

Check configurations, document evidence and prepare responsible teams.

OPERATE AND IMPROVE

Provide monitoring, readiness reviews and continuing support as scoped.

Discuss your security solution

Let us turn your security priorities into implemented controls and practical operational readiness.
