

iLoans

Loans & Lending Management

Coordinate lending operations from application to collection

iLoans brings loan origination, approval, release, billing, collection, and performance reporting into a connected operating workflow. The platform also covers credit investigation, insurance, accounting integration, capital build-up, and consolidated visibility across branches.

CONNECTED CAPABILITIES

01

Application and investigation

Manage loan applications and credit investigation as connected activities within the lending lifecycle.

02

Approval and release

Coordinate approval workflows and loan release, with the operating process defined around the institution's requirements.

03

Billing and collection

Bring billing and collection activities into the same lending workflow for a clearer operational view.

04

Capital and branches

Monitor capital build-up and consolidate information across multiple branches.

05

Insurance and accounting

Include insurance activities and accounting integration within the agreed solution scope.

06

Lending performance

Use performance reporting and executive dashboards to review lending operations at management level.

BUILT AROUND YOUR OPERATIONS

For lending institutions, cooperatives, rural banks, microfinance groups, and credit unions.

Connect the lending lifecycle

Connect applications, approvals, releases and collections through an agreed lending workflow.

A TYPICAL OPERATING JOURNEY

01

APPLY

Applications and credit investigation

02

APPROVE

Approvals and decision responsibilities

03

RELEASE

Release, insurance and accounting

04

COLLECT

Billing, collections and performance

Illustrative workflow. Final sequence follows the agreed scope.

BUSINESS BENEFITS

Clearer handoffs

Help teams coordinate work between application, approval, release, and collection.

Branch visibility

Support management review of lending information across branches.

Informed oversight

Bring lending performance into executive discussions through reporting and dashboards.

Integration and deployment

Plan accounting connections around your existing systems, lending data and reporting needs. Confirm interface ownership and migration responsibilities during solution design.

Select browser-based access and cloud or on-premise deployment around your architecture, security and support requirements.

Scope to confirm

Confirm release, configured functions, interfaces and controls. Reporting must be scoped to your applicable requirements.

The iThink approach

ASSESS

Lending processes, branches, data and existing systems.

DESIGN

Workflows, decision roles, reporting and interfaces.

CONFIGURE AND VALIDATE

Agreed functions and representative lending scenarios.

DEPLOY AND SUPPORT

User preparation, cutover and support responsibilities.

Discuss your lending requirements

Let us review your lending workflows, branch needs and priorities to define a practical implementation scope.
