

Roadmap & Blueprint

Turn findings into an investment plan

A practical basis for procurement and execution.

We define target architecture, project portfolio and budget; implementation sequence, operating model and sourcing; and governance and measures of success. The roadmap connects technology choices with a practical basis for investment, procurement and execution.

CONNECTED CAPABILITIES

01

Target architecture

Define the intended technology direction so architecture decisions support business priorities.

02

Project portfolio

Bring the proposed initiatives together into a portfolio that management can review and prioritize.

03

Budget and investment

Connect the planned portfolio with budget considerations and the investment decisions ahead.

04

Implementation sequence

Set out the sequence of initiatives so procurement and delivery can follow a considered plan.

05

Operating model and sourcing

Define the operating and sourcing choices needed to support the target direction.

06

Governance and success measures

Establish how management will govern the roadmap and assess progress against its intended outcomes.

BUILT AROUND YOUR OPERATIONS

For organizations ready to turn assessment findings or technology priorities into a defined roadmap and investment plan.

From priorities to an investment plan

Connect target architecture, sequencing and governance with the choices management needs to make before procurement and execution.

A TYPICAL ENGAGEMENT JOURNEY

01

ALIGN

Confirm priorities and the findings to build on.

02

DEFINE

Set the target architecture and operating direction.

03

SEQUENCE

Organize the portfolio, sourcing and investment plan.

04

GOVERN

Agree oversight and measures of success.

Illustrative engagement. Final sequence follows the agreed scope.

BUSINESS BENEFITS

Coherent direction

Connect architecture and operating choices with business priorities.

Investment visibility

Review the portfolio, budget and sequence as one technology plan.

Execution readiness

A practical basis for procurement and execution.

Engagement and outputs

A defined technology roadmap and investment plan.

The plan brings target architecture, portfolio, budget, sequencing, sourcing and governance into one management view. Use it to guide the next procurement and execution decisions.

Scope to confirm

Planning depth, budget assumptions, portfolio boundaries, executive participation and expected outcomes are agreed around the decisions management needs to make.

The iThink approach

START WITH PRIORITIES

Use the business context and relevant findings to frame the roadmap.

DEFINE THE TARGET

Connect architecture with the operating model and sourcing approach.

PLAN THE INVESTMENT

Bring projects, budget and implementation sequence into a practical plan.

AGREE GOVERNANCE

Define management oversight and the measures of success.

Discuss your technology roadmap

Let us connect your priorities with a defined architecture, roadmap and investment plan.
